

ROOFTOP PAVILION PROJECT

As the core location for Victoria's Pride, the centre hosts events that welcomes community in a safe and inclusive space all year round.

While the rooftop is a beautiful event space, it is often rendered unusable in Melbourne's fickle weather.

VISIBILITY WITHOUT LIMITS

To unlock the full potential of this space, we are moving forward with the Glass Pavilion, an elegant 50m² architectural addition designed to blend sophisticated style with year-round functionality.

Constructed from a minimalist steel frame and high-performance polycarbonate sheeting, this pavilion will serve as the crown jewel of the Centre, ensuring the Rooftop Terrace thrives as a premier event space regardless of the season.

This design prioritises a seamless connection with the outdoors. The pavilion features expansive glass doors that can be fully retracted to invite in the summer breeze, while integrated air conditioning and weather-proofing provide a climate-controlled haven during the colder months. With comfortable seating for 50 people, it creates an intimate yet versatile environment for everything from advocacy workshops to milestone celebrations.

While the community has shown incredible support for this project in the past, the reality of rising global construction costs has created a new challenge. We are now looking for visionary supporters to help us bridge the final funding gap.

To bring this landmark project to completion, we are seeking minimum donations of \$1,000. Your contribution is more than a gift toward steel and glass; it is an investment in a permanent home for our stories, our celebrations, and our future.
